## Humidity-/Temperature-/Air pressure Logger

### EASYLog 80CL

Product-ID: 602773

Humidity-/Temperature-/Air pressure Data-Logger (each 250.000 measured values) for climatic applications.

| Description:   |  |
|--|--|
| The <b>EASYLog 80CL</b> can be configured, started and stopped by its buttons. It is possible to record max. 64 recording sequences (=start/stop processes) with max. 250.000 data sets (humidity/temperature/air pressure). The device can also be configured and handled by the comfortable software GSOFT40K. There is the possibility to block the stopping of the logger by the buttons to protect the logger of unauthorised handling. |  |
| The device supports the display of units relevant for the air conditioning technology: wet bulb temperature, dew point temperature, enthalpy, atmospheric humidity or absolute humidity.   |  |
| The <b>EASYLog 80CL</b> provides a big variety of additional functions:  |  |
| • <b>SeaLevel correction:</b> instead of the barometric air pressure the pressure at sea level can be displayed (input of height above sea level needed).  |  |
| • <b>Min-/max- value memory:</b> callable by the buttons, the highest and lowest value since the start (or reset) of the logger is saved here.   |  |
| • <b>Min-/max- alarm function:</b> the exceeding of adjustable min-/max- alarm boundaries by the displayed value is monitored.   |  |
| <b>Optional:</b> alarm output for alarm message of the logger available!   |  |
